

Modell 20 spät F60

order no 401105

Use

Model 20 spät F60 sliding tray comprises a hatch with a tray that moves in opposite directions and comes ready for installation. Ideally it should be used as an indoor counter unit, especially on late or night shifts. The unit is suitable for handing over files, documents, rolls of money and similar objects.

Safety and features

- Sliding deep tray for handing over larger items up to 100 mm high, such as files with 80 mm spines.
- Automatic lock at full extension on either side. Lock can only be released by the operator behind the counter by using the lever.
- It is not possible to reach through the hole while the deep tray is sliding or manipulate the mechanism.
- After releasing the operating lever the tray runs automatically (spring-operated) into a locked end position.
- Materials offer fire protection adhering to F60 and FB4* firearms protection capable of withstanding heavy handgun fire and more than 60 minutes of exposure to fire at up to 1000°C.
- Model 20 spät F60 fulfils German UVV regulations.

Materials and use

- The cover is made out of a 1 mm thick stainless steel plate.
- Carriage and deep tray made out of a 3 mm steel plate with black-brown powder coated cover.
- Frame made out of 2mm brushed stainless steel.
- All metal parts have been produced using state-of-the-art precision laser cutting technology for ultimate quality.
- Model 20 spät F60 is best suited to internal use, especially for late or night shifts.
- The hatch unit requires no maintenance. No need for cleaning or lubrication.

Modell 20 spät F60

Installation and dimensions

The sliding tray comes ready for mounting in prepared counter sections. The tray is mounted by inserting it into the recess in the counter from above. With wooden counters the tray can be fitted flush with the counter. With stone counters it is placed on top. Consideration must be given to access requirements and the possible need to remove the unit later in the unlikely event of repairs.
