

Outdoor use

Model 52.01 P3

order no 403001

Use

Model 52.01 P3 is a sliding pass-through that comes ready for installation and comprises an integrated two-way intercom system.

The model has three drawers and it's particularly suitable to passing through PIN-pad reader. It is primarily aimed at night time use in roofed outdoor areas such as petrol station forecourts, gatehouses and kiosks.

The thickness of the wall or frame above the drawer up to 65 mm (95* mm).

*with cranked lever.

Safety and features

- Sliding pass-through for pedestrians, fits flush with outside façade and features three drawers, front panel and integrated intercom for automatic two-way conversation.
- Small drawer for handing over change and receipts – comprises coin trough with user-friendly edges for removing coins plus integrated underlay for use as a deskpad.
- Large drawer ideal for merchandise such as drinks, food, magazines, etc.
- Separate PIN-pad drawer for passing-through PIN-pad reader.
- Alternating slide mechanism locks automatically in return position. Lock can only be released by the operator behind the counter by using the lever.
- It is not possible to reach through the hole as the unit changes position or manipulate the mechanism.
- Dust and draught sealed.
- Materials offer firearms protection, capable of withstanding heavy handgun fire eg, up to 44 Magnum.
- Model 52.01 P3 fulfils German UVV regulations.

Materials and use

- Steel plate pass-through.
- Fascia and small drawer made out of 1 mm thick stainless steel, drawers carriage in 3 mm steel plate with black-brown RAL 8022 powder coated cover.
- All metal parts have been produced using state-of-the-art precision laser cutting technology for ultimate quality.
- Model 52.01 P3 is suitable for outdoor use in covered areas.
- The unit requires no maintenance. No need for cleaning or lubrication.

Model 52.01 P3

Installation and dimensions

The unit comes ready for mounting in prepared walls/façade recesses. Coming from the outside, it is mounted by inserting into the recess before screwing tight underneath the unit on the inside. Consideration must be given to access requirements and the possible need to remove the unit later in the unlikely event of repairs.
