

Outdoor use - fire resistance

Model 63.01H FB6 F90

Order Number 403024

Use

Model 63.01H FB6 F90 is a flush-fitting sliding pass-through with intercom for walls up to 140 mm thick, comes ready for installation. The drawer allows handing over objects up to 120 mm high, such as files with 80 mm spines.

The counter unit is frequently used for access control in indoor and covered outdoor areas as correctional facilities, government buildings and company gates. FB6 firearms certification comes as standard. Fire protection is EI/F90.

Safety and features

- Flush- fitting sliding pass-through counter with fascia and integrated Public intercom for automatic two-way conversation.
- The drawer and steel plate cover stop each other from opening at the same time - the drawer can only be opened when the cover is closed.
- Locks automatically in both end positions. Lock can only be released by the operator behind the counter by using the lever.
- Tamper-safe: it is not possible to reach through the hole when the drawer is extended or manipulate the mechanism.
- For handing over passes, files and similar items up to A4 size.
- Dust and draught sealed.
- Materials offer firearms protection, capable of withstanding heavy handgun fire, e.g. up to G3 battle rifle. The standard model has received FB6* certification from the firearms licensing authority.
- Model 63.01H FB6 F90 fulfils German UVV regulations.

Materials and use

- Pass-through is made of steel and security steel.
- Fascias, tray and cover are made of brushed stainless steel
- All metal parts have been produced using state-of-the-art precision laser cutting technology for ultimate quality.
- Model 63.01H FB6 F90 is suitable for indoor and outdoor use in covered areas.
- The unit requires no maintenance. No need for cleaning or lubrication.

* series comes with certificate

Outdoor use - fire resistance

Model 63.01 H FB6 F90

Installation and dimensions

The unit comes ready for mounting in prepared walls/façade recesses. It is mounted from the outside by inserting the unit into the recess before screwing it tight underneath on the inside.

Consideration must be given to access requirements and the possible need to remove the unit later in the unlikely event of repairs.
