

## Complete Units

### Model 7020 F90

Order no. 403065

#### Use

Model 7020 F90 is a complete window counter and transfer unit that comes ready for installation. It is ideal for indoor use as a sales or reception counter for places such as front-desk receptions, gatehouses or for handing over passes, receipts, firearms and similar items.

#### Safety and features

- Window unit including Model 20 F90 slide-action reverse pass-through and integrated intercom for automatic two-way conversation.
- Counter-directional deep tray for handing over larger objects up to 100 mm high, such as firearms and files with 80 mm spines.
- Automatic lock at full extension in either direction. Lock can only be released by the operator behind the counter by using the lever.
- It is not possible to reach through the hole or manipulate the mechanism while the deep tray and carriage are sliding.
- After releasing the operating lever the tray runs automatically (spring-operated) into a locked end position.
- Materials offer fire protection adhering to F90\*\* and FB4\* firearms protection capable of withstanding heavy handgun fire and more than 90 minutes of exposure to smoke and fire at up to 1000°C.
- Model 7020 fulfils German UVV regulations.

#### Materials and use

- Safety glass adhering to BR4 NS. and Promaglas 90/37 Type 1.
- Casing made out of 2 mm brushed stainless steel.
- Carriage and deep tray made out of 3 mm black-brown powder coated steel.
- All metal parts have been produced using state-of-the-art precision laser cutting technology for ultimate quality.
- Model 7020 F90 is best suited to indoor use.
- The unit requires no maintenance.  
No need for cleaning or lubrication.

\*\* The Model is part of the tested model 7553 F90

\* Series comes with certificate

### Model 7020 F90

#### Installation and dimensions

The unit comes complete with power cables and is ready for exact mounting in prepared wall sections. It is inserted into the recess from the outside to fit flush with the wall. This is done by removing the inner frame before screwing the unit into place from the inside to prevent tampering. Consideration must be given to access requirements and the possible need to remove the unit later in the unlikely event of repairs.
