

Complete Units

Model 7553 H

Safety and features

- Window unit with sliding Model 53 H pass-through for pedestrians, fits flush with outside façade. Front panel for handing over flat items up to 120 mm high, and an integrated "Public 4" intercom. Drawer locks automatically in both end positions.
- Case hatch with swivel doors, hatch controlled automatically via control panel, additional mechanical door lock provides extra security: only one door needs to be opened. Cannot be manipulated.
- 90° opening angle for both doors.
- Materials offer firearms protection up to level FB4, capable of withstanding heavy handgun fire.
- The unit has received FB4 certification from the respective authorities.
- Model 7553 H fulfils German UVV regulations.

Use

Model 7553 H is a complete unit with a pass-through and case hatch for mounting in indoor or outdoor areas. The unit is particularly suitable for handing over large sums of money or large objects such as file holders or money cases. It is also suitable for use as a sales or reception counter for places such as front-desk receptions, gatehouses or for handing over passes, documents or receipts in areas requiring a high level of firearms protection.

Materials and use

- Safety glass adhering to BR4NS.
- Frame made of brushed stainless steel.
- Front panel and cover made of brushed stainless steel, sheet steel parts powder coated in RAL 8022 black-brown.
- Case hatch made of steel, inside finished with stainless steel.
- Doors available in custom finish.
- All metal parts have been produced using state-of-the-art precision laser cutting technology for ultimate quality.
- Model 7553 H is suitable for use in indoor and outdoor areas.
- The unit requires no maintenance. No need for cleaning or lubrication.

- Also available as Model 7653 with money trolley hatch 106
- Also available with window shutters and illumination
- Special sizes available on request
- Frame coatings available in alternative RAL colours on request

Modell 7553 H

Installation and dimensions

The window unit comes complete with power cables and is ready for exact mounting in prepared wall sections. It is inserted into the recess from the outside to fit flush with the wall. This is done by removing the inner frame before screwing the unit into place from the inside to prevent tampering. Consideration must be given to access requirements and the possible need to remove the unit later in the unlikely event of repairs. There should be a 230 V socket near the counter on the inner side.
