Money trolley and case hatches

Model 106

Use

The Model 106 is a tamperproof money trolley hatch with swivel doors which fits flush to the floor.

It is ideal for use in central banks, supermarkets and other facilities where large amounts of money or valuables are handed over in cases or money trolleys.

The unit conforms to firearms protection class FB4 (without certificate).

Example

As Model 7653 the Model 106 can be combined with deal-tray Model 53.01 as a complete element including glass, frames and two way intercom system.

Safety and features

- Money trolley hatch with alternately opening doors for mounting in a counter which fits flush to the floor.
- Doors activated automatically via control panel. Security system ensures only one door opened at a time. Doors are mechanically locked and cannot be manipulated.
- Doors can be hinged as required in pairs, with opening angle of 90° each.
- Materials offer firearms protection, capable of withstanding heavy handgun fire in accordance with bullet proof class FB4.
- Model 106 fulfils German UVV regulations.

Material and use

- Money trolley hatch is made of steel plating, interior walls are reinforced with stainless steel.
- Door bearing and lock are highly robust.
- All metal parts have been produced using state-of-the-art precision laser cutting technology for ultimate quality.
- The unit requires no maintenance. No need for cleaning or lubrication.

Outer dimensions (in mm)

Width	1000
Depth	1100
Hight	1000

Hatch clearance

Width	715
Depth	1006
Hight	902

Weight

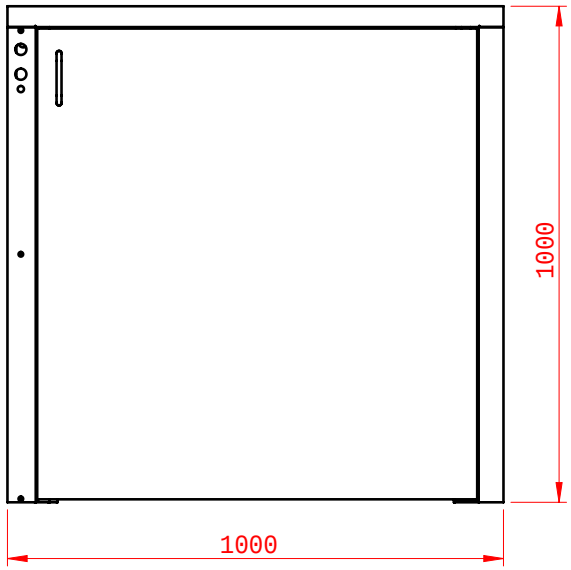

450 kg

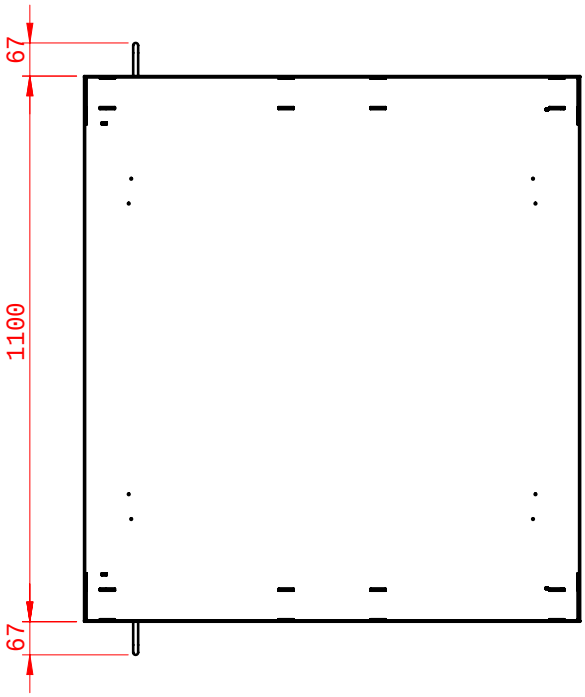

Miscellaneous

- Also avaiable as Model 105, as a case hatch which can be installed in counters.
- Special sizes available on request. Coatings available in alternative RAL colours on request.

Installation and dimensions

The model 106 comes complete with power cables and is ready for mounting in prepared wall sections. It can be mounted under a counter or window element (e.g. Model 7020).
There should be a 230 V socket near the counter on the inner side. Consideration must be given to access requirements and the possible need to remove the unit later in the unlikely event of repairs.
