- Window unit with sliding pass-through Model 53 F90 for use as a flush-fitting pedestrian counter with front fascia a for handing over flat objects up to 30 mm high, including integrated "Public 3" intercom. The Drawer locks automatically when pulled back.
- Case hatch, electromechanical hatch operation via control panel and safety activation with additional mechanical door lock: only possible to have one door open at a time. Mechanism can not be manipulated.
- Opening angle for both doors: 90°
- Materials offer fire protection adhering to F90 and FB4* firearms protection capable of withstanding heavy handgun fire and more than 90 minutes of exposure to smoke and fire at up to 1000°C. Has received F90 and FB4* certification from the respective authorities.
- Model 7553 F90 fulfils German UVV regulations.

Use

Model 7553 F90 comes as a complete unit with integrated pass-through and case hatch. The unit comes ready for installation and is suitable for indoor or outdoor use. It is particularly well suited to handing over larger sums of money or items such as briefcases or valuables boxes, although it can also be used as a reception or front-desk counter for handing over passes, documents and receipts in high-security areas requiring firearm* or fire protection.

Materials and use

- Safety glass adhering to BR4 NS and Promaglas 90/37 Type1.
- Casing made out of 2 mm brushed stainless steel.
- Cover panel made out of 1 mm brushed stainless steel, lid made out of 2 mm brushed stainless steel with a black-brown powder coating.
- Case hatch made out of 3mm steel, lined with stainless steel.
- Doors can be hinged as required, in pairs
- All metal parts have been produced using state-of-the-art precision laser cutting technology for ultimate quality.
- Model 7553 F90 is suitable for indoor and outdoor use.
- The unit requires no maintenance. No need for cleaning or lubrication.

* Series comes with certificate

Modell 7553 F90

Installation and dimensions

The unit comes complete with power cables and is ready for exact mounting in prepared wall sections. It is inserted into the recess from the outside to fit flush with the wall. This is done by removing the inner frame before screwing the unit into place from the inside to prevent tampering. Consideration must be given to access requirements and the possible need to remove the unit later in the unlikely event of repairs. Requires a 230 V socket nearby the counter on the inner side.
